

FAHA Final Assignment (Chapter 9) // Assignment 9.1 Grading Rubric

Question 1.

Does the response identify an online source that contains text?

0. No.
1. Yes.

Question 2.

Does the response contain code or code-like language that could plausibly be read as possibly achieving the scraping task?

0. No code is produced.
1. Some code is produced but it is not plausible that anything like it could possibly achieve the scraping task.
2. Code is produced and it is plausible that something like it could possibly achieve the scraping task.
3. Code is produced and, with some cleaning up or translation, it would likely achieve the scraping task.

Question 3.

Is the explanation of how the code would work helpful?

0. No explanation of how the code would work is given.
1. Some explanation of how the code would work is attempted, but it is not illuminating.
2. An explanation of the how the code would work is given, and it is mostly helpful.
3. An explanation of the how the code would work is given, and it is highly illuminating.

Question 4.

Is the justification of the interestingness, usefulness, or importance of scraping text from the proposed source convincing?

0. No justification of the interestingness, usefulness, or importance of scraping text from the source is given.
1. A justification is attempted, but it does not provide any reasons to believe that the proposed source is interesting, useful, or important.
2. A justification is given, and it provides good reason for belief in the interestingness, usefulness, or importance of the source, even if you do not agree with it.
3. A justification is given, and it provides good reason for belief in the interestingness, usefulness, or importance of the source, even if you do not agree with it, and moreover the justification spells out why these reasons support the use of the proposed source.
